## SENIOR SOFTWARE ENGINEER

[braumlaian@gmail.com](mailto:braumlaian@gmail.com) | [LinkedIn](#) | [Github](#)

### PROFESSIONAL SUMMARY

Senior Software Engineer with 5 years of experience, focused on delivering high-impact solutions that drive business value. Skilled in leveraging cutting-edge technologies to solve complex problems, with a proven track record of creating scalable, high-quality software.

### EXPERIENCE

#### Senior Software Engineer, Anthroware | NC, USA (Remote)

Aug/2023 - July/2024

Main contributor to a tool called "Hominid", which boosted productivity by enabling non-technical users to quickly create software solutions. "Hominid" was built with React and Node.js and it was used to develop a \$2M project for one of the largest staffing companies in the US.

- Developed new features specifically for the \$2M project, contributing to its success and functionality.
- Designed and implemented multiple features, fixed bugs, and wrote comprehensive tests and documentation
- Improved "Hominid" user's satisfaction by addressing pain points and implementing effective solutions.

#### Mid-Senior Software Engineer, Palqee | London UK (Remote)

Fev/2022 - Aug/2023

Led the development of core features for a global B2B GRC & Data Privacy Hub with 40k active users.

- Engineered backend solutions for 4 new features using Node.js, GraphQL, PostgreSQL, and other technologies;
- Boosted test coverage by 30% through the implementation of unit and integration tests with Mocha, Chai, and Jest;
- Architected and designed solutions in alignment with business requirements and technical resources;

#### Mid Software Engineer, PremierSoft | Brazil (Remote)

June/2021 - Fev/2022

Outsourced to Anthroware as a Senior Software Engineer, contributed to 5 diverse projects, which I highlight:

- SneezApp: Developed a real-time illness tracker for the USA using React and Node.js, processing over 1 million records for interactive map displays.
- HiveTracks: Enhanced a serverless Node.js API for a global beekeeping management app used by 30k+ beekeepers;
- Next Door Photos: Developed features and pages using React/Next.js for a platform connecting realtors with digital media specialists called.

#### Junior Software Engineer, Tegrus | Brazil (Remote)

Fev/2021 - June/2021

Developed the frontend and implemented backend features for a landing page/form builder system, reducing the engineering team's workload by 80%.

- Architect, develop, and test 5 key features, including form building and multiple integrations.
- Streamlined operations by integrating Pipefy, automating workflows, and saving hundreds of hours monthly for the support team.

#### Junior Software Engineer, Carambola | Brazil (Remote)

Set/2020 - Fev/2021

Contributed to the development of a marketplace empowering small businesses to showcase and sell their products.

- Designed and implemented several frontend and backend components.
- Conducted QA testing, achieving 70% test coverage.
- Implemented CI/CD pipelines, reducing the delivery time for new features.
- Enhanced UI/UX by gathering and validating requirements, creating user stories, tasks, designs, and wireframes;
